• Data Description

This tool serves to empower researchers in crafting comprehensive and compelling research profiles. It goes beyond the mere listing of achievements, guiding users to articulate narratives that highlight not only their academic accomplishments but also the broader societal impact of their work. It aims to help the researcher to communicate a more holistic picture of themselves and their work.

As an academic, you can use this interactive PDF to generate a short academic profile e.g. for your profile page (e.g., PURE, People page, ORCID, LinkedIn) and communicate a complete picture of who you are and what your work is about, emphasising its societal relevance and impact.

• Method

This workbook stems from the collaboration between the EUR strategic project Evaluating Societal Impact (ESI) team with the Erasmus School of Economics (ESE).

• Description

As part of the Erasmus University Rotterdam Strategy 2024 'Creating positive societal impact', the project on Evaluating Societal Impact (ESI) supports the development of an EUR wide approach for impact that is embedded in a deliberate, goal-oriented process of impact governance on all relevant levels and within all the core activities of our university (research, education and engagement). The project started in 2020 and closed off by the end of 2024. Its ambition was to cocreate tools and templates for thinking about and working towards impact in a more structured way and to provide best practices with and for the EUR community.
