

This file gives an overview of the files in the zip-file IntertemporalCorrelationAversion, belonging to the paper

## **Intertemporal Correlation Aversion - A Model-Free Measurement**

by Kirsten I.M. Rohde and Xiao Yu

### Experiment

- The file Intcorav\_experimentinstructions summarizes the instructions for the experiment.
- The complete instructions from qualtrics can be found in RT\_A-id.qsf (immediate resolution) and RT\_C.qsf (gradual resolution). These files can be imported in qualtrics.

### Data

- The raw data are in RT\_Aid and RT\_Cid.
- tocleandata-A and tocleandata-C are two Stata (StataMP 16.1) do-files to clean the data.
- These two files generate stata data files cleandata-A.dta and cleandata-C.dta

### Analysis

- data\_analysis is the Stata do-file used to analyze the data in cleandata-A.dta and cleandata-C.dta. The do-file mentions which parts were used to generate which tables and figures in the paper and Online Appendix.
